**FIT THIS!**

**SECUREBASE**

24HR LOCKSMITHS & CARPENTERS

Due to recent burglaries in the country through uPVC and wooden doors fitted with the standard euro lock we at Securebase are now installing our new anti-snap, anti-drill anti-bump key locks.

These locks have been developed in response to demand from Locksmiths & Crime Prevention Advisers, the Securebase Breaksecure Cylinder greatly reduces the risk of entry from the Euro Profile Cylinder attack.

With break-ins from cylinder attack on the increase the Securebase Breaksecure Cylinder is available in all sizes for uPVC & wooden doors.

These cylinders are also suitable where locks may be subjected to vandalism.
